MONTHLY REPORTER

Vol. 1, No. 1

July 1942

A branch of the U. S. Department of Agriculture Library has recently been established in Albuquerque to serve the entire personnel of the Department of Agriculture in Arizona, Colorado, New Mexico and Utah. The new Branch was formed by the consolidation of the former Soil Conservation Service Regional Library, the Forest Service Library, and the Bureau of Plant Industry Library.

The Library occupies the same building as the former Soil Conservation Service Library and retains the same telephone number and Post Office box.

Publications may be borrowed by field or regional personnel. The usual loan period is two weeks for employees in Albuquerque and three weeks for employees in the field. Current periodicals are loaned for three days in Albuquerque and seven days in the field. All publications may be renewed, if desired, unless other requests for material are pending.

All material on hand is for your use. You are invited to visit the Library.
